

# KOSKENKORVA® VODKA

## KOSKENKORVA VODKA

Koskenkorva is a classic vodka made from nature's best ingredients. Koskenkorva has been distilled in the village of Koskenkorva in Finland since 1953. The northernmost grown barley, pure unfiltered groundwater and continuous distillation result in one of the smoothest, purest vodkas in the world. Koskenkorva has won several awards at international industry competitions, including Master and Gold medals at the renowned annual Vodka Masters competition. Sustainability is at the core of the Koskenkorva brand and the spearhead in innovation. The Koskenkorva distillery is a forerunner in the bio- and circular economy.

## SUSTAINABLE VODKA MADE HONESTLY

In 2018, the Koskenkorva distillery was awarded the Green Company of the year. Our distillery employs a circular economy, meaning that in addition to our barley-based vodka, our plant produces starch and raw materials for animal feed, we have our own bioenergy power plant, and thanks to renewable fuel, we have been able to decrease our carbon dioxide emissions remarkably. It's true we are proud of our award, but we never set out to win anything. We just meant to make one of the world's best vodkas in a way that caused the least waste because, well it just makes sense.

# WHEN LIFE GIVES YOU BARLEY, MAKE VODKA.
